

WATER RECLAMATION FACILITY PHASE 1 EXPANSION AND IMPROVEMENTS

- Design Completed: December 2018
- Early Construction Activities Started: September 2018
- Construction Anticipated to be Completed: December 21, 2020
- Total Project: Approximately \$40 Million

JACOBS® Design Engineer: Jacobs Engineering, Inc., Denver and Loveland, Colorado

HC HYDRO CONSTRUCTION General Construction Manager At Risk Contractor: Hydro Construction, Fort Collins, Colorado

New Major Facilities and Equipment:

Step-Feed Aeration Basins, Ultraviolet Disinfection Equipment, Aeration Blower Building, Secondary Clarifier, Rotary Drum Thickening and Polymer Equipment, Conversion of Existing Aerobic Digesters to Autothermal Thermophilic Aerobic Digestion (ATAD), ATAD Building, Odor Control Facilities, Numerous Sludge Pumps, Yard Piping, and Miscellaneous Mechanical and Electrical Equipment.

New WRF facilities will meet new stricter United States Environmental Protection Agency (USEPA) and Colorado Department of Public Health and the Environment (CDPHE) wastewater treatment standards and produce Class "A" biosolids that can be beneficially recycled.
