

Fort Collins-Loveland Water District

Hydrant Meter Rental Guidelines and Agreement as of January 1, 2025

Intent: The use of fire hydrant meters is intended for only those situations when a large volume of water is needed over a short period of time (defined as less than twelve (12) months). Hydrant meters will not be rented for single-family home construction. Typically, only one meter will be provided for each developmental or commercial project. The meter must be used within our District boundaries and may not be used on hydrants belonging to other water utilities. District boundary map can be found on our website. **Hydrant meters are not intended as a substitute for permanent connections.**

Guidelines and Procedures:

- The number of hydrant meters is limited; therefore, meters are available on a first come first serve basis.
- Requests for install and removal of hydrant meters should be conveyed one business day in advance.
- Use of water through a hydrant meter is solely at the discretion of the District.
- The District will determine if the requested location is acceptable.
- The renter is responsible for securing the meter to prevent unauthorized use, damage to meter, or loss/theft of meter.
- The outlet thread will be 2.5" NST; no hose or adaptors will be provided.
- The fire hydrant must be operated in the fully opened or fully closed position at all times.
- The District reserves the right to terminate the rental agreement without prior notice.
- The District reserved the right to pull meters, if needed and may or may not be subject to charge.
- The renter is responsible for all costs associated with damages (parts and labor) to the hydrant meter, including loss and/or theft.
- If damage occurs to the fire hydrant, the renter may be held responsible for all repair costs, including parts and labor.
- The renter accepts responsibility that all backflow prevention requirements are met.
- Meters will be read and billed on at least a 30-day cycle. The District may request picture of the meter head for billing purposes and renter must comply within two business days.
- Invoices are due 30 days from invoice date. District may apply late fees for invoices not paid within 30 days. All invoices not paid within 60 days will have the hydrant meter repossessed by the District, at the cost of the renter. Future rentals will be contingent upon all fees being paid and may require a deposit.
- The District reserves the right to require a deposit for hydrant rentals based off past rental history or lack of rental history. Deposit refunds are available upon request and must meet specific criteria. Please email ap@fclwd.com for any questions.

Fees: Installation and removal days are included as rental days.
