

IT'S TIME TO PRE-ORDER YOUR GARDEN IN A BOX AND PLAN FOR WATERWISE LANDSCAPING!

What is Garden In A Box?

Garden In A Box is an incredible program from Resource Central. Each year, they curate and produce a selection of professionally designed, low-water garden kits tailor-made for Colorado yards. These DIY kits include quart-sized perennial plants, Plant by Number maps, seasonal maintenance suggestions and watering schedule recommendations.

Complete your pre-order now to ensure you can pick up and plant your kit in May and June.

Why order a Garden In A Box?

- Garden In A Box makes it easy to have a waterwise yard with plants ideal for Colorado's climate.
- More than half of residential water use is on outdoor irrigation. If you can remove turf or replace high-water plants with low-water plants from Garden In A Box, you'll save money on your water bill and reduce your usage.
- Garden In A Box kits are custom-curated, so you won't need to wander around the nursery wondering which plants will look good together.
- Attract the locals! Garden In A Box will help you attract helpful pollinators, such as honeybees and butterflies.

Pre-order now because these boxes sell out! Scan the QR code to visit resourcecentral.org/gardens.
