

# CELEBRATING WATER QUALITY MONTH!

This month is Water Quality Month! A month dedicated to highlighting the importance of water quality and spreading awareness about why safe drinking water matters.

We're celebrating by sharing our annual water quality report. The report includes information on the quality of our water, and some fun facts about the District and the water we provide. Most importantly, our reports show your water meets or exceeds all State and Federal standards, meaning your water is of the highest quality.

## READ THIS YEAR'S REPORT TO LEARN MORE ABOUT:

- Our latest source water assessment and protection
- Lead, copper, and contaminant measurements
- Your water and our commitment to its quality
- General information about the District
