Chairman

MINUTES OF EXECUTIVE SESSION

Regarding the executive session referred to in the Minutes of the Board Meeting of the Fort Collins-Loveland Water District on October 15, 2024, it was duly moved and seconded that the Board enter into an executive session pursuant to Sec. 24-6-402(4)(b), C.R.S., for the purposes of receiving specific legal advice from the District's special water counsel, Scott Holwick, on the District's opposition to the Montava Development and the water court application related thereto. The motion carried unanimously and the Board entered into an executive session.

Mr. Holwick specifically advised the Board with respect to status of the water court proceeding and its timeline, as well as various strategies, questions and concerns raised by the Board members regarding the District's role in the proceeding now and as trial approaches, all such advice constituting privileged attorney-client communications in the opinion of Mr. Holwick.

CERTIFICATION BY REGISTERED ATTORNEY

I, Scott Holwick, Reg. No. 32009, hereby certify that the executive session was devoted to providing specific legal advice to the Board of Directors regarding the above-referenced legal issues, and that all such communications were privileged under applicable Colorado law and Supreme Court rules.

Scott E. Holwick

CERTIFICATION BY BOARD PRESIDENT

I, hereby certify that I served as chairperson of the executive session of the Board of Directors held on October 15, 2024, and that the entire session was confined to the receipt of specific legal advice from the Board's special water counsel, and that no other matters were discussed.

President and Chair

Fort Collins-Loveland Water District Special Board Meeting Minutes
Thursday, October 3, 2024 1:00 PM
5150 Snead Drive, Fort Collins, CO

1. Roll Call

ATTORNEY STATEMENT

Pursuant to Section 24-6-402(2)(d.5)(II)(B), C.R.S., I, Allison Ulmer, state that the law firm of Collins Cole Winn & Ulmer, PLLC is General Counsel to the Fort Collins-Loveland Water District, and that I was present at the time the Board convened in Executive Session on November 13, 2024. I further state that the Executive Session was not recorded because it constituted a privileged attorney-client communication and that no electronic record thereof was necessary. The Board did not adopt any proposed policy, position, rule, regulation or take any formal action during the Executive Session.

Metered revenue includes billings to customers and is the primary source of operating revenue. Customers are billed for the prior month's consumption. The fluxuation year over year is the result of weather variations, increase in number of customers served and rate increases.

The historic average is the average of the last three years' actual revenue.

We Make Life Better Through Landscaping

Estimate

Contract No. - 18657 (v. 0)

October 25, 2024

Submitted To:

Fort Collins - Loveland Water District
5150 Snead Dr
Fort Collins, CO 80525

Project

FCLWD Main Office
5150 Snead Dr
Fort Collins, CO 80525

Enhancements

Mobilization

- Mobilize all equipment and trailers to jobsite
- Delivery of materials to jobsite by ZGL

Demo of Unwanted Existing Landscape

- Remove unwanted existing landscaping; remove all landscaping in the bed on east side of building outside wall on both sides of sidewalk; remove (5) dogwoods and approx. (5) junipers, 575 sq. ft. of existing mulch, fabric and drip irrigation
- Properly dispose of removed materials -recycle as much as possible
- Prep area for landscape renovation

Shrub Planting

- Dig hole and prep dirt with compost
- Plant (1) deciduous shrubs of a 5 gallon size; (1) Apache Plume
- All plants are to be placed according to the plan
- See warranty details

Perennial Planting

- Dig holes and prep dirt with compost
- Plant (3) grasses of a 1 gallon size; (3) Karl Foerster Feather Reed Grass
- Plant (9) perennials of a 1 gallon size; (3) 'Cheyenne Spirit' Coneflower, (3) Purple Coneflower, (3) Black Eyed Susan
- All plants are to be placed according to the plan
- See warranty details

Mulch

- Shredded cedar mulch to be installed at a 3" depth
- No weed barrier to be used unless requested by the client (for an additional charge)
- Approx. 240 sq. ft. of mulch

Boulders

- Install approximately (3.5) tons of accent boulders; (7) 1/2 ton boulders
- (3) boulders to be selected for seating style boulders around break area, (4) boulders to be accents to new landscape bed
- Boulders to be Aspen boulders
- Boulders to be partially buried to give a more natural appearance
- Boulders to be placed according to plan

Irrigation

- Attach and extend poly pipe from existing drip zone to new planting beds to ensure there are no leaks or unneeded drip emitters to plants that were removed
- Poly pipe to be pinned into the ground to prevent movement
- Install appropriate emitters for each plants recommended water amount

Dry Creek Bed

- Dig out 6" deep swale to create natural appearance
- Install 3.5 oz commercial grade weed barrier in the swale
- Install a mix of 5-12" cobble, 2-4" cobble, and 1.5" river rock in dry stream bed
- Dry stream bed to be approx. 165 sq. ft.

Paver Patio

- Excavate soil approximately 6-8" for new pavers and subsoil compacted
- Install Geo Textile fabric between existing soil and base to reduce contamination of materials
- Install approximately 4-6" of gravel and compact
- Install 2" of 3/8 chip for pavers to set on
- Hand install Belgard Dimensions 12 pavers on top of chip gravel; pavers to be Rio color
- Compact pavers and install polymeric sand for an even finish after completion
- Patio to be approximately 135 sq. ft.; patio to be cut to circle with approx. 12 ft diameter with short walkway to meet with sidewalk; patio to help ensure ADA compliance
- See contract for warranty details

Breeze Pathway

- Gray breeze pathway to be installed around paver patio to extend useful space of break area and extend to other side of sidewalk to connect design elements
- Install rolled top galvanized metal edging on either side of the pathway
- Edging to be pinned down to keep breeze and other materials separate
- Install 3.5 oz commercial grade weed barrier under the pathway
- Breeze pathway to be installed at a 3" depth and compacted with plate tamper

Flagstone Pathway

- Colorado red flagstone steppers to be approx. 20" x 20" and 1 3/4" thick to create small path to connect wall gate to break space
- Flagstone steppers to be recessed into landscape material and placed on breeze to prevent movement
- Steppers are to be placed to mimic natural step length (approx. 6-9" spacing)

Native Seeding

- Convert bluegrass turf near break area to native grass area
- Glyphosate to be used to kill off existing turf
- Mow dead grass low and aerate area to prep for installation of seed
- Drill seed approx. 620 sq. ft. of Buffalo grass/Blue Grama grass seed mix
- Irrigation programming to be amended for germination and establishment of new seed
- Hand pulling/spraying of weeds may be necessary during establishment period; no mowing to be done until fall when the new grass is dormant unless otherwise needed

Job Site Clean Up

- Clean up of landscaping during the project and after completion

Service	Price

Enhancements: Job Site Clean Up	\$425.00
Project Total	\$16,070.00

Quoted prices good for 30 days after receipt of quote.

Plant Warranty:

Zak George Landscaping warrants all plantings as follows:

- **Trees**
 - Planted from April 1 - August 15. Full 1 year one time warranty. Plant material only. Replacement labor at cost of client.
 - Planted from August 16 -March 31. 50% warranty on plant material. Replacement labor at cost of client. 100% warranty from time of planting if winter watering is conducted at additional cost by ZGL (4-8 times dependent on weather).
 - Spade planted trees are not warranted.
- **Shrubs**
 - Planted from March 15-Sept 30. Full 1 year one time warranty. Plant material only. Replacement labor at cost of client.
 - Planted from Oct 1- March 14 - 50% warranty on plant material. Replacement labor at cost of client. 100% warranty from time of planting if winter watering is conducted at additional cost by ZGL.
- **Grasses & perennials**
 - Planted from March 15-Sept 30. Full 1 year one time warranty. Plant material only. Replacement labor at cost of client.
 - Planted from Oct 1- March 14 - No Warranty

Replacement plants are not guaranteed. Warranty period commences at the time of install.

Zak George Landscaping reserves the right to void any/all warranty coverage due to neglect, not watering the plant, excessive moisture, or act of God. Warranty does not cover acts of nature, frost, freeze drought or acts of force. Warranty is void if customer provides false information.

Payment:

Payment is due, in full, thirty (30) days following the invoice date. By accepting this agreement, you agree to pay a charge of 2% per month with a minimum charge of \$5.00 per month on any amount not paid within 30 days of the invoice date, and you agree to pay any and all professional fees associated with any steps necessary to collect unpaid balances.

What to Expect During the Transformation!

References, Liability Insurance, Workers Compensation, Auto Liability documents available upon request

Prior to starting - Your ZGL representative is busy getting the materials lined up and ordered for project.

Schedules are being built and given to the project supervisor. The final details are being lined out on the plans. NOTE: We give each project 100% attention once we are on your project.

Mobilization - This is where the equipment and job trailers are moved to your project. This usually means that the construction will start within the next 24 hours. Most jobs have multiple pieces of equipment and one job trailer. Line locates are done around this same time to locate your utilities.

Time to get dirty - Remember that every project is unique, but there are similarities among jobs. At this point the demo will start. This is the dirtiest part of the project. We will have old materials going out and new materials coming in at the same time. We try to keep the streets and material storage areas as clean as we can but there are a lot of factors that play into each project. Our goal is to move things efficiently and effectively as we estimated. Please excuse our mess as we work through things.

During the project - You will find dirt on the sidewalks, dust, pipes sticking out of the ground, materials in the street or blocking part of the street depending on the project, so be careful. A section of fence may be taken out for access. Machinery, TRUCKS and trailers coming and going. Foot traffic, wheelbarrow and machinery traffic in the yard. Guys resting or taking a break and much more.

Communication - This is key to all parties. We at ZGL feel it is much easier to fix things along the way vs. waiting until the project is over. It saves everybody time. If at any time you need clarification or want to look at things let us know and somebody from ZGL would be happy to meet with you to discuss. Your ZGL representative will be working vigorously behind the scenes to keep the project moving along smoothly. Your ZGL representative will be making frequent visits to the project to ensure the project is running smooth and make any necessary changes. **Don't hesitate to contact or call us at any time through out the project.**

Finished project - Before the project is getting close to finishing your ZGL rep. will walk the project with the supervisor to discuss any possible changes. Once that is done a final walk through will be scheduled with the customer to walk you through your project and answer any questions. At this point ZGL looks to collect any outstanding monies from the project.

Thank You For The Opportunity To Serve You!

WILDROCK

PUBLIC RELATIONS & MARKETING

FORT COLLINS-LOVELAND WATER DISTRICT

QUARTERLY COMMUNICATIONS UPDATE

November 2024

Pop Quiz!

TRUE OR FALSE?

The District has a Facebook, Instagram
and Nextdoor presence

TRUE

- The District has maintained an active presence on Facebook since 2018 and on Nextdoor since 2021. Instagram is new this year.
- The District regularly (3-4 times/week) shares tips, news, updates, notifications and more with its followers.
- This year, the District has received 631K+ impressions, 17.8K+ engagements and 2.4K link clicks.

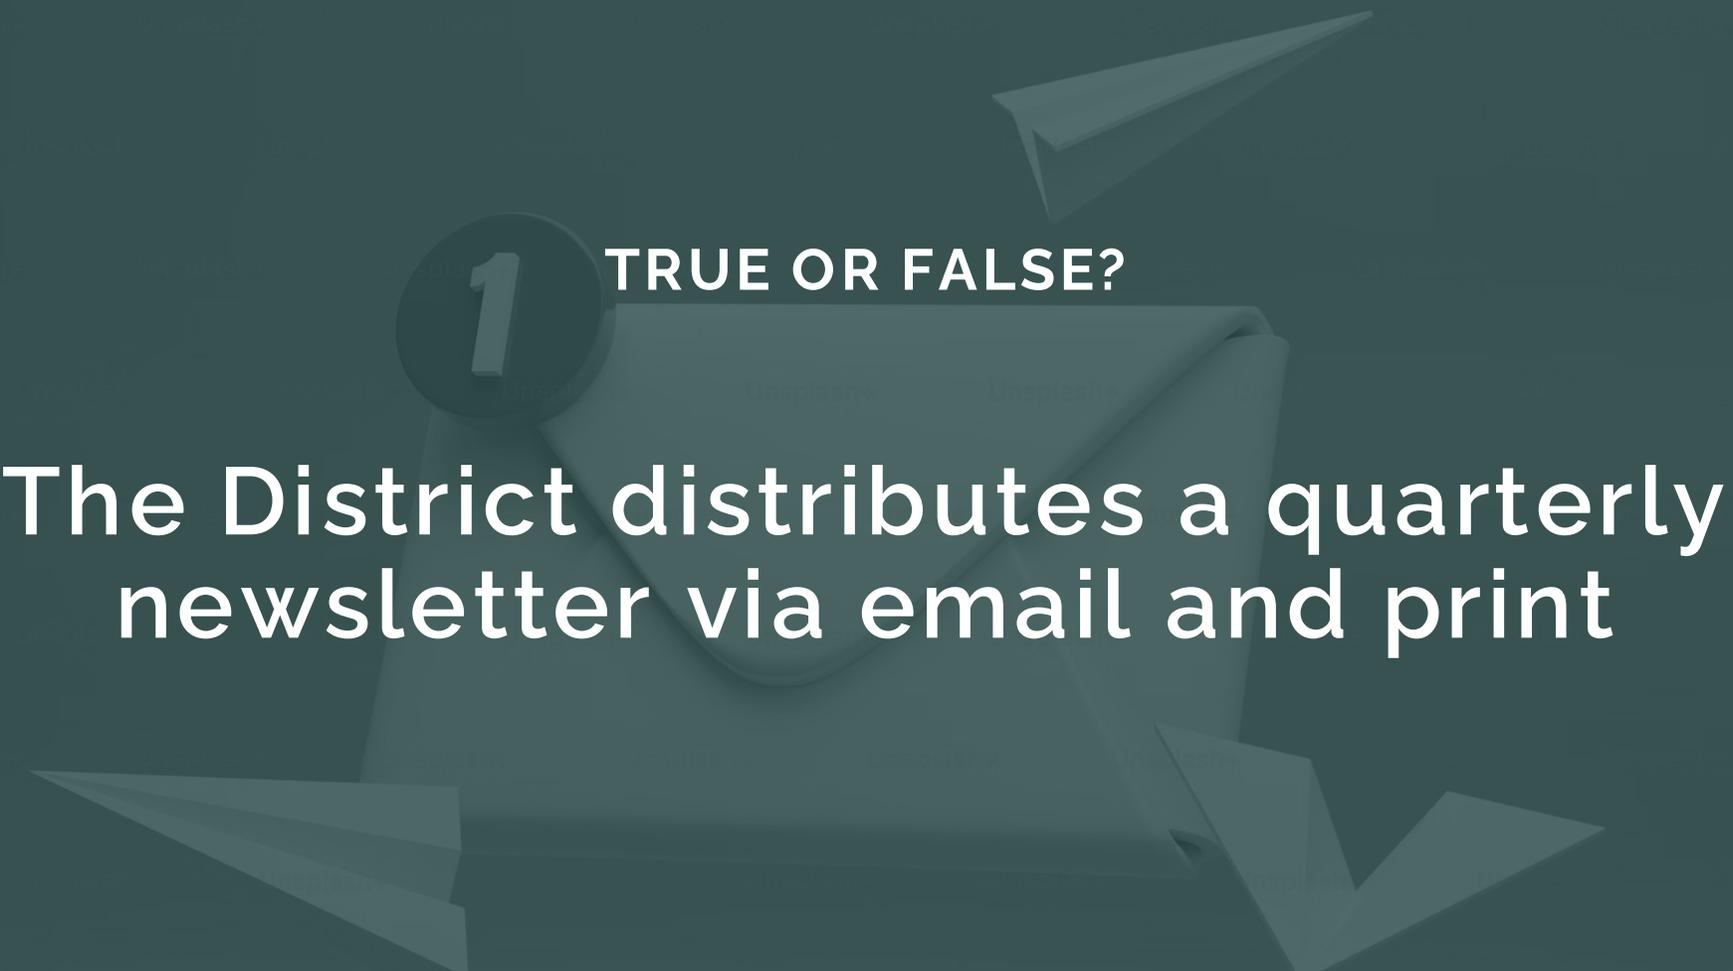

2024 RECAP

The screenshot shows a series of social media interactions. At the top, a comment from **Jan Douglass** discusses concrete work leading to a broken water main. Below it, **Sheamus Nakahara** replies, and the **Fort Collins-Loveland Water District** (the author) responds. Another comment from **Wil Hodges** asks about double water systems, with a reply from the district. At the bottom, **Lolly Colling Light** comments on rain water collecting cisterns. The interface includes icons for likes, replies, and hiding comments.

- Posts on social media have covered everything from water conservation tips to promotions to crisis communications.
- Some of the top comments and questions received from followers:
 - Occasionally, people complain about perceived water restrictions, construction, etc., but many times, the community comes in to dispel misinformation,
 - Sometimes, the community chimes in with conservation ideas and questions about conservation.
 - Many people post comments with images with cats and dogs.

A dark teal background featuring a stylized illustration of a paper airplane in flight, with its wings spread wide. Below the airplane is a large, open envelope, suggesting the theme of communication or distribution. The overall aesthetic is clean and modern.

1

TRUE OR FALSE?

The District distributes a quarterly newsletter via email and print

TRUE

- The District has maintained a regular quarterly newsletter since 2018 that's distributed electronically and printed/included with bills.
- The District also has the ability to send one-off emails as needed.
- The District's subscriber list currently includes 17.7K+ email contacts.
- This year, the District has maintained a 60% open rate and 1.3% click rate.

2024 RECAP

- Newsletter topics have included board of directors updates, rates, conservation philosophy and programs, water rights, capital projects, customer feedback surveys and more
- In addition to newsletters, one-off emails were also sent regarding the Soldier Canyon outage in July, Timnath watering restrictions over the summer, grant opportunities for HOAs and announcing CLRWTA.

TRUE OR FALSE?

The District distributes a billing insert
twice per quarter to customers who
receive printed bills

TRUE

- The District has distributed two billing inserts every quarter to customers who receive a printed bill since 2020.
- The District also publishes the inserts on the website to ensure access to everyone.

2024 RECAP

- Billing insert topics have included installing a pressure-reducing valve, CLRWTA announcement, conservation programs, the annual water quality report, frost date vs. freeze date, facts about the District and rates updates.
- In addition to regular billing inserts, additional printed communications were distributed for the Timnath Watering Restrictions.

TRUE OR FALSE?

The District publishes a monthly blog on its website

TRUE

- The District has published a blog every month since 2020.
- This year, the blog has received 5.3K+ views.

Water in the West | Sharing Utility Corridors
Sep 3, 2024

2024 RECAP

- Blog topics have included a CLRWTA announcement, education on water providers, Title 32/special district education, cybersecurity, water quality report, water rentals and our approach to water.
- The most popular blogs this year were:
 1. Tips for going out of town
 2. 2024 rates update
 3. Sharing utility corridors
 4. How do water rights work?
 5. 2024 capital projects

TRUE OR FALSE?

The District, when newsworthy and appropriate, distributes press releases and op-eds to local and regional news outlets?

- The District has engaged in proactive and reactive media outreach since 2018.

TRUE

The screenshot shows the Loveland Reporter-Herald website. At the top, it says "LOVELAND REPORTER-HERALD" with "Subscribe" and "Log In" buttons. Below that, it displays the date "Friday, June 21st 2024" and the temperature "85°F". The main section is titled "Opinion Columnists" with sub-links for "Editorials", "Letters", "Opinion Columnists", and "RH Line Calls". A "TRENDING:" section lists topics like "Emerald ash borer found", "Feed and Grain project done", "Summer fun ideas", "LFRA gratitude", and "Greeley cigar lounge". The main article is titled "Stephen Smith: Celebrate Smart Irrigation Month by adopting new technologies and tips to reduce water usage" by Stephen Smith, dated June 21, 2024. The article text begins: "A life passion of mine has revolved around water, irrigation and how we all play a role in conserving one of our most precious resources. With July designated as Smart Irrigation Month by the Irrigation Association (IA), and at a time when we see the highest demands for water due to landscape irrigation, it is a great time to talk about innovations in irrigation that make conservation more accessible to those who want to participate. While the Fort Collins-Loveland Water District's (FCLWD) stance is that responsible water conservation is an individual choice, it's best to be equipped with information to make decisions that help us all as a community." A "Listen to this article" audio player is visible. On the right, there are promotional banners for "NOCO COUPONS" and "LOVELAND AREA EVENTS".

The screenshot shows the Coloradoan website. At the top, it says "Coloradoan." with "SUBSCRIBE NOW One Month Free" and a search bar. Below that, it displays "MARKETPLACE Search For & Place Classifieds" and a navigation menu with "News", "Sports", "Business", "NoCo Life", "Advertise", "Obituaries", "eNewspaper", and "Legals". The main article is titled "Horsetooth Road lanes to close over several weeks for waterline installation" by Miles Blumhardt, Fort Collins Coloradoan. The article is published on August 15, 2024. A video player shows a white truck with a pothole repair machine. The video caption reads: "FORT COLLINS STREETS DEPARTMENT'S POT HOLE VEHICLE CLEARS HOLE OF DEBRIS, APPLIES ASPHALT MIX AND PACKS IT." Below the video, it says "This machine patches potholes in minutes" and "Fort Collins Streets Department has a vehicle that cleans, fills and packs a pothole all from the comfort of the cab. Miles Blumhardt, milesblumhardt@coloradoan.com". At the bottom, it says "Westbound lanes of Horsetooth Road will be closed for several weeks as crews install a waterline under the busy road."

2024 RECAP

- This year, the District received 16 media placements covering construction projects, increased capacity at Soldier Canyon, and an op-ed from Stephen Smith about Smart Irrigation. Plus, another 10 for the CLRWTA announcement
- We have paused op-ed efforts due to to strategically preserve our customer attention for water supply and rate issues this fall. We actively monitor how much content we are pushing to our customers and gauge their responsiveness, so we don't become background noise in their feed

YTD EFFORTS RECAP

How Are Communications Doing

TOPICS WE'VE COVERED ACROSS CHANNELS

- **Rates**
- **CLRWTA**
- **Conservation philosophy**
- Who is your water provider?
- Water rentals & agriculture
- Water rights in Colorado
- **Capital projects & future planning**
- HOA grant opportunities
- **Conservation programs (Garden In a Box, Rachio, Slow the Flow)**
- Water Efficiency Plan
- Water quotas
- Customer feedback opportunities
- Benefits of a PRV
- **Irrigation & sprinklers**
- **Conservation tips**
- Hydrant flushing
- Board of Directors
- Updated mission
- **Resources from Resource Central & Northern Water**
- Xeriscaping vs. Zeroscaping
- Backflow prevention
- Snowpack
- **Construction updates**
- El Nino & La Nina
- Mid-year rates update
- Smart Irrigation Month
- Property insurance rates
- Surveys for customer feedback
- Drought conservation process
- Winter prep/sprinkler blowouts
- Sharing utility corridors
- Customer service week
- Imagine a Day Without Water
- Shower Better Month
- Cybersecurity
- Emergency phone number reminder
- Title 32/special district vs. local government
- Community events (like HOA night out and Timnath Fall Festival)

KPIs

Our primary objective is to produce and distribute high-quality, factual and relevant content. KPIs simply measure the effectiveness of channels where content is distributed.

	2024 KPI	Performance to date
Facebook Follower Growth	+15%	+25%
Facebook Engagement Rate	5%	3.4%
YoY Website Traffic	+10%	+22%
Email Open Rate	40%	56%
Email Click Through Rate	3%	1.73%
Earned Media Placements	7-10	16

LOOKING AHEAD

2024-2025 Communications

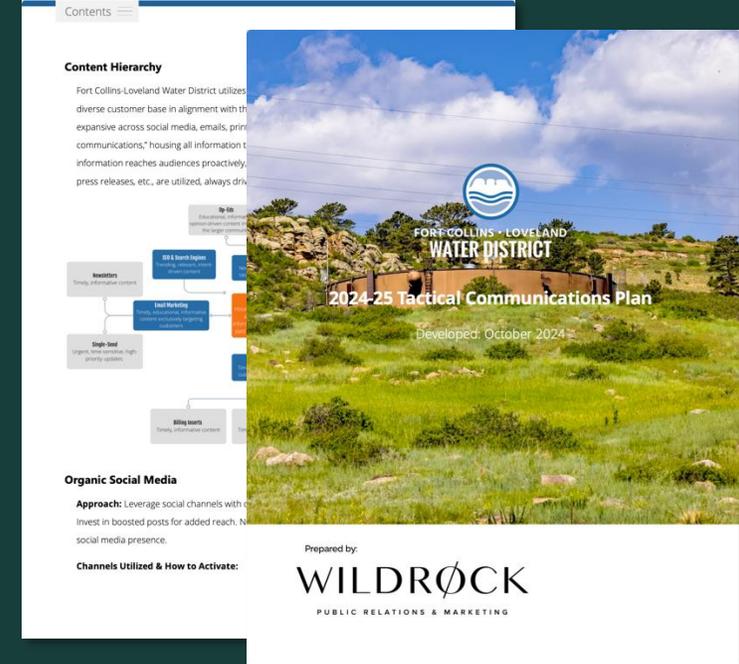

STRATEGIC PLANNING

In September, we met with the FCLWD team to discuss the approach for communications in 2024-25.

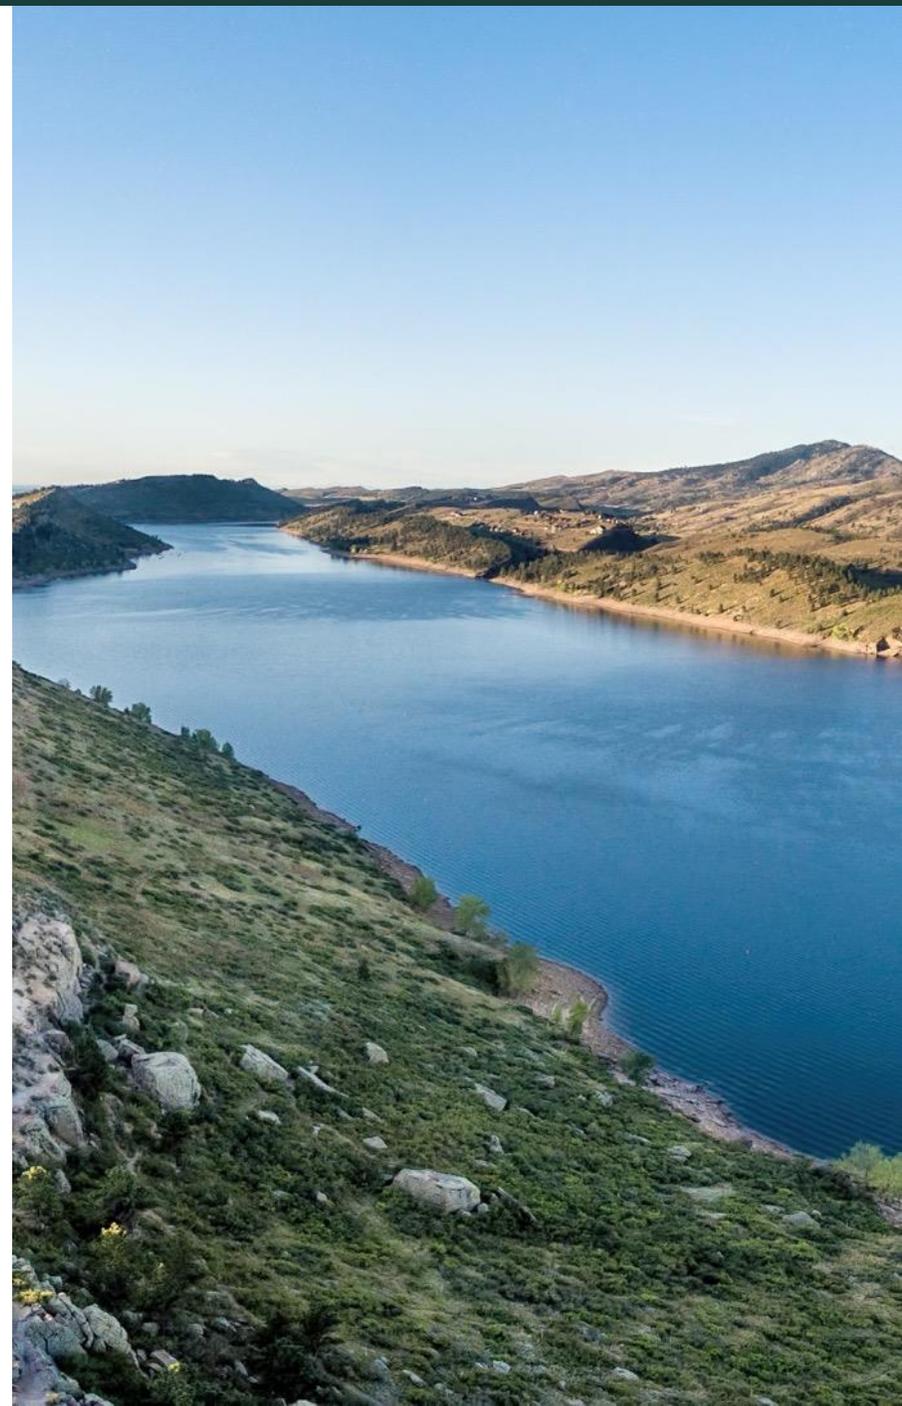

This year, we had two sessions. One to discuss goals & objectives in the next year and another to discuss messaging and how we position the District.

Following the sessions, WildRock developed two deliverables to outline our approach to communications for FCLWD.

THE MARKETING VISION

The primary goal we are looking to achieve through communications efforts in 2024-25 is to continue solidifying our brand reputation as a sustainable, high-quality, secure, reliable and cost-effective water provider and further grow our credibility in the drinking water industry. We will optimize existing channels and strategically explore select new opportunities that align with our mission.

THE STRATEGY

To achieve this goal, we will pursue a content marketing and thought leadership strategy that seeks to validate our industry expertise, educate customers, our service population and the general public about key messages and increase overall brand awareness.

THE OBJECTIVES

Our primary objective is to produce and distribute high-quality, factual and relevant content (quality over quantity). To measure the effectiveness of the channels where this content will be distributed and to execute a successful content marketing and thought leadership strategy, we will:

Expand communications efforts on the website through SEO and utilize other channels to direct back to the site to position the website as the “hub” and increase traffic by 5% YOY.

Optimize our current channels, including social media, the blog, the newsletter and billing inserts, to increase our social media fan base by 10% and maintain a 3% social media engagement rate, 40% email open rate and 2% email click rate.

Engage in proactive PR to secure 2-3 media placements and ensure we are ready for future situations with a crisis communications plan.

Extend our partnerships to become a trusted resource within the scope of our services in the community with HOAs, municipalities, other special districts, etc., providing quiet excellence to customers and partners.

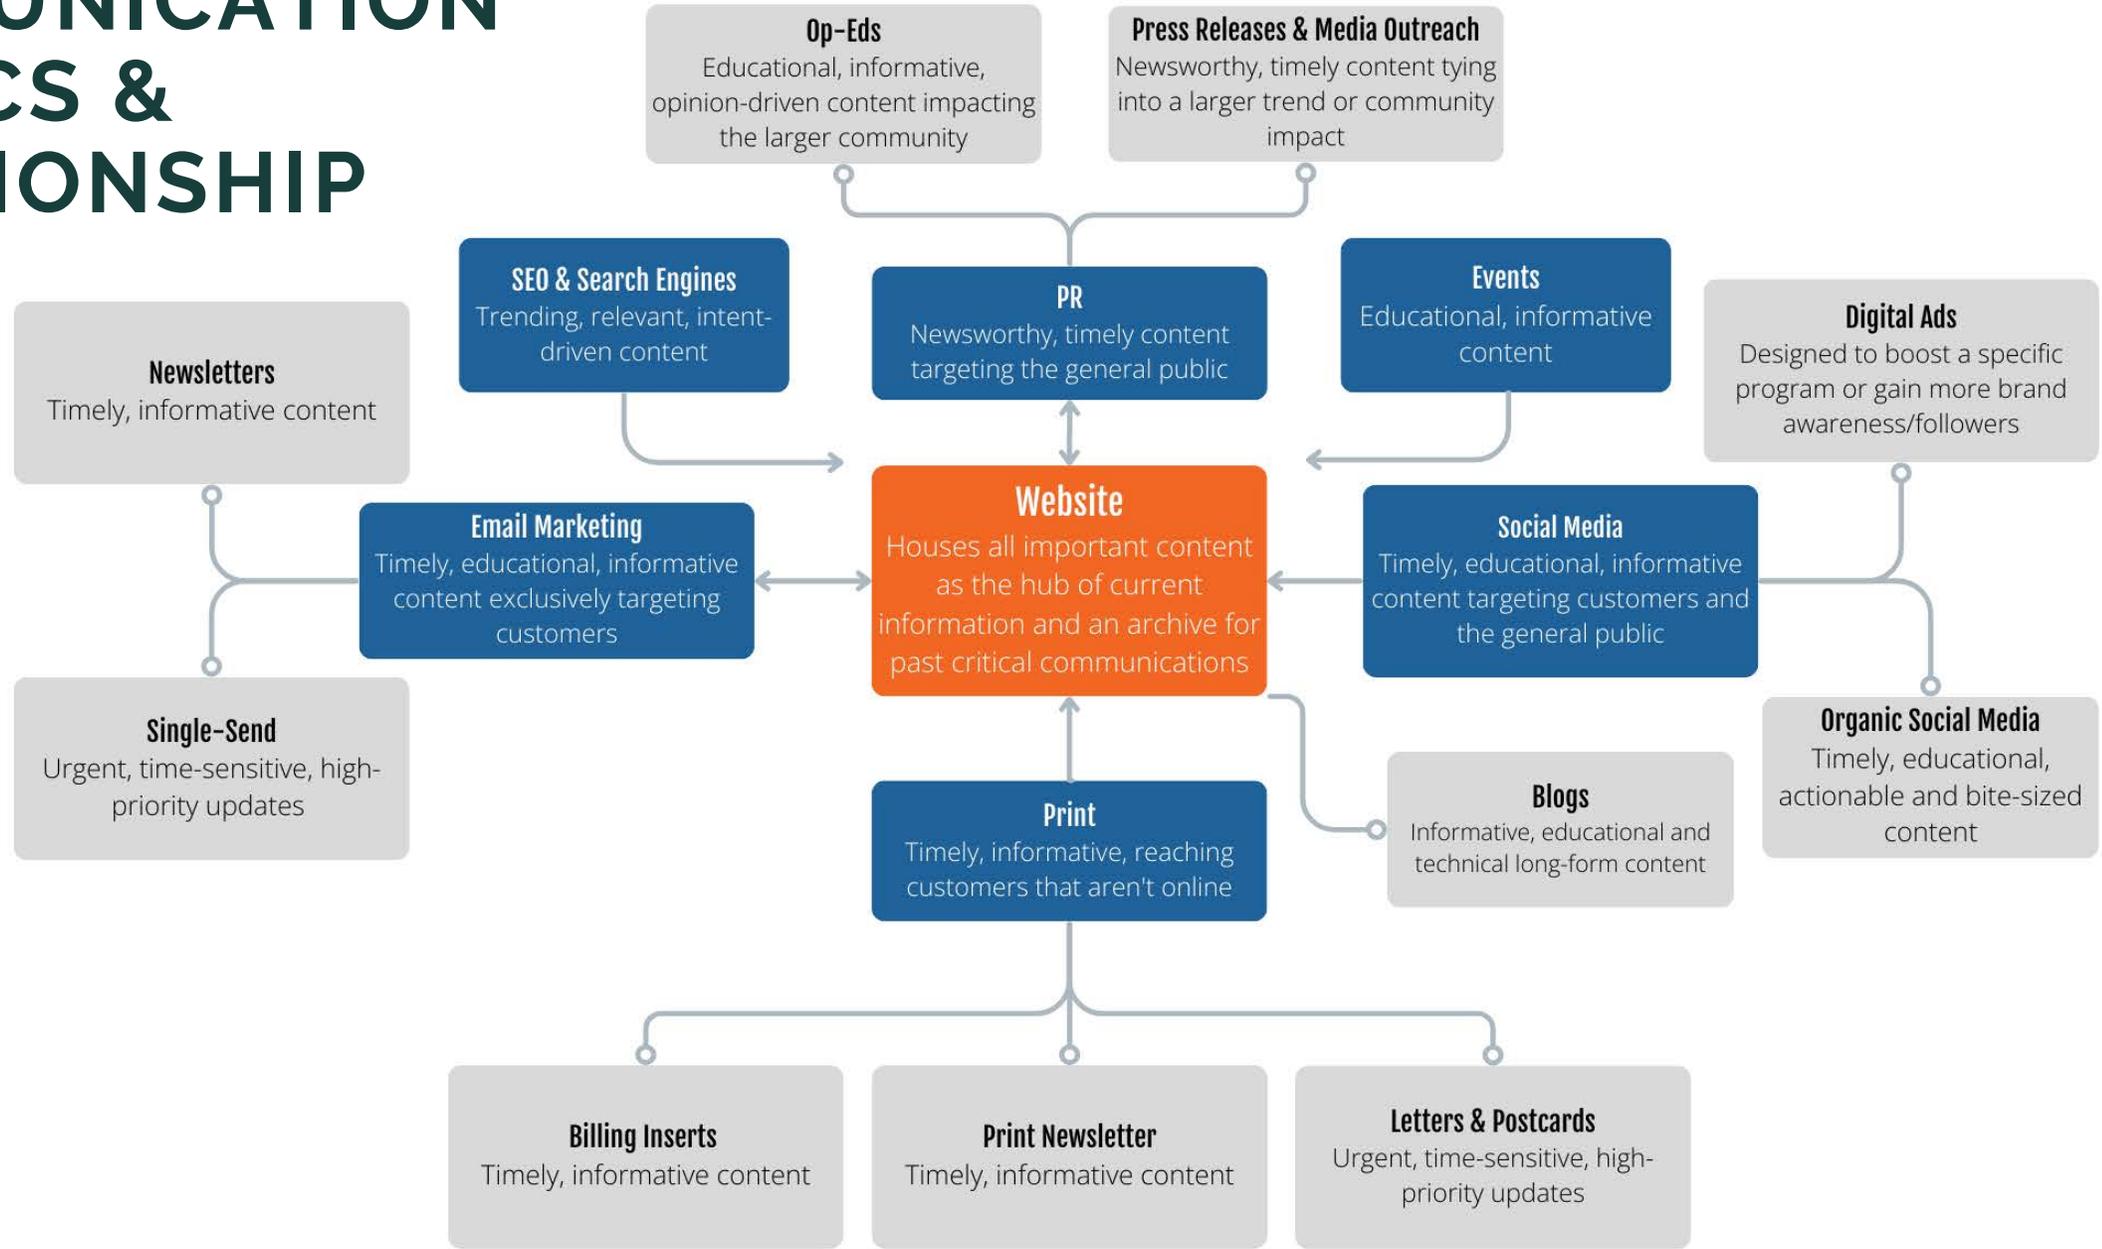

CONTENT CHECKLIST

To ensure that all content produced is “high-quality, factual and relevant,” we’ll utilize the following checklist prior to publishing or distributing content:

- Thorough research has been conducted with reliable sources (i.e. American Water Works Association, Northern Water, SDA, etc.)
- A member of the FCWLD team or board has been interviewed to provide expert insights, as applicable
- Content aligns with seasonal and current trends
- Content and assets adhere to ADA regulations (sequential headlines, alt text, reading level, etc.)
- Chris Pletcher and/or Amanda Proctor have reviewed and given approval

Date: November 14, 2024

Re: Capital Project Update – Zone 5 – Phase 2 – Horsetooth Road

PROJECT MANAGER: Linsey Chalfant, P.E.

More project information at:

<https://fclwd.com/water/construction-projects/>

The 24" waterline installation for Zone 5-Phase II is progressing slightly ahead of schedule.

MILESTONES ACHIEVED

- Approximal 8,400 LF of pipe installed to date
- Waterline was tied into both sides of the waterline that was bored under the PV&LC canal
- Paving of Horsetooth Road from Shields to Dunbar has been completed
- All service tie-overs complete

UPCOMING MILESTONES

- October to end of November: Open cut installation of 24" Waterline in Horsetooth Road
- Road Open before Thanksgiving
- Lesson Learned

PROJECT HURDLES

- Planned shutdowns to tie into existing waterlines
- Weather

OUTREACH ACTIVITIES

- Mailed postcards & hung door hangers prior to start of construction.
- Informational sign with flyers available on site
- Maintain project webpage on District site
- Press release for the closure of westbound Horsetooth from Colony Drive to Shields.

Re: Capital Project Update – Western Backbone – Phase 2

Western Backbone Project Map

More project information at:

<https://fclwd.com/water/construction-projects/>

MILESTONES ACHIEVED-PROJECT COMPLETE

- 200LF of 42" pipe installed across Prospect Road
- 355LF of 42" pipe installed in Pleasant Valley Road and Overland Trail.
- 144LF of 30" pipe installed in Overland Trail.
- Removed 50LF of existing 20" steel pipe in Overland Trail
- Crossed under City's 42" waterline and over 60" waterline.
- Completed ahead of schedule and under budget.

UPCOMING MILESTONES

- Project Complete

PROJECT HURDLES

- DR14 pipe fitting in Butterfly Valve
- Removing Line Stop

OUTREACH ACTIVITIES

- Mailed postcards & hung door hangers prior to start of construction.
- Continuing door hangers as impacts change
- Informational sign with flyers available on site
- Maintain project information on District website
- Variable message boards at all detour routes

Metered revenue includes billings to customers and is the primary source of operating revenue. Customers are billed for the prior month's consumption. The fluxuation year over year is the result of weather variations, increase in number of customers served and rate increases.

The historic average is the average of the last three years' actual revenue.

Data Lake & Month-to-Month MDS

CLIENT: Fort Collins-Loveland Water District
5150 Snead Dr.
Fort Collins, CO 80525
ATTN: Chris Pletcher

DATE: 05/23/2024
PAYMENT TERMS: Net-30

PROJECT & DELIVERABLES

Blue Margin will provide support as specified on *Addendum A* hereto.

OTHER REQUIREMENTS OR TERMS:

Client will provide:

- Access to key systems and resources, and;
- Access to key subject matter experts throughout the development process.

FEES:

Customer will pay the Fees on *Addendum B* attached hereto.

TERMS AND CONDITIONS:

This contract is made under and pursuant to that Master Services Agreement entered into between Blue Margin and Client in October 2022. In the event of any conflict with this contract and the Agreement, the Agreement will govern. All late payments will incur late fees as provided in the Master Services Agreement.

The parties may modify the terms of this contract by submitting a written proposed change order (the "Change Order") which will become part of the applicable contract when executed by both parties, and the services described therein will become part of the Services.

Any services performed by Blue Margin outside the scope of this agreement, such as additional services requested, will be invoiced as a separate contract.

All fees will be paid in US dollars via ACH or by check, without deduction or offset.

SIGNATURES:

CLIENT

Addendum A: MDS Products and Timeline

Data Lake Setup

Timeline:

Blue Margin plans to begin data lake setup and source ingestion by 6/17/2024. We anticipate full ingestion and setup will require 2-3 weeks.

If access to source systems is delayed, the timeline will be extended and delay fees may apply.

Activities:

- Coordinate with the FCLWD team for access to Zultys
- Setup Azure resources
- Identify key transactional tables for lake ingestion
- Develop Synapse pipelines and ingest source data into Azure data lake
- Schedule Synapse pipeline runs and monitor
- Establish SQL endpoint to provide to the FCLWD team

Deliverables

- Azure cloud data lake with Zultys data

Delay Policy and Fee:

- Once the project is initiated, we will charge \$1,000/day if progress is blocked by delays in access to source systems
- We will proactively communicate and attempt to solve access delay challenges with FCLWD
- Blue Margin will charge the delay fee if our progress is blocked and reserved resources are unable to continue development while awaiting access

Managed Data Service (MDS):

Timeline:

- Blue Margin will begin MDS on 07/08/2024 with no set term commitment.

Services Included in MDS:

- Data Architecture Monitoring:
 - Confirmation / monitoring of ETL runs (Mon-Fri 8 AM – 5 PM MST)
 - ETL process time monitoring and optimization
 - Error detection and resolution for data loads
 - Off-hours failures will be diagnosed and addressed the following business day
- Azure / Power BI Management and Administration
 - User management for Azure resources, databases, and Power BI (adding and removing access)
 - Updating pipelines as source specifics change, but not including migration to different sources
 - New table ingestion, as needed (from sources that have already been ingested into Azure data architecture)
- 30 hours of Client Success Team involvement, including:

- Weekly advisory sessions/sync ups – tailored consulting to cover any topics related to Power BI reporting and Azure, including but not limited to:
 - Query development and optimization support
 - Basic data model updates, including adding columns to mode tables, column data type management, and DAX measures that do not require changes to data structures or sources
 - Assistance locating data from sources (data discovery)
 - Advice on developing reports and support on existing data models
- Report development & enhancements
- Training, advisory, and development support
- Management & prioritization of development backlog
- Break/fix support
- Existing PBI dashboard support

Add-On Services

- MDS does **not** include:
 - Source migrations or ingesting new sources into client’s Azure data architecture
 - Additional sources can be imported into the data lake at \$10K/source

Tiering-Down MDS

- FCLWD reserves the right under this agreement to “tier down” MDS for months in which we’re not actively developing dashboards. If FCLWD elects to tier down MDS, we will still monitor the data architecture and ETL runs, and provide support.
- While not required, Blue Margin would appreciate a 30-days’ notice if FCLWD intends to tier down MDS, so that we can plan our capacity accordingly
- If FCLWD tiers down MDS, we will adjust the monthly charge from 10K/month to 5K/month

Hosting:

- FCLWD will host the data and Azure resources on their Azure tenant.

Addendum B: Fees and Invoice Schedule

Fees:

- **Azure Data Lake Development & Zultys Integration** - \$25,000
- **Month-to-Month MDS** - \$10,000/month
- **Additional Data Sources into Lake House:** \$10,000 per source

Invoicing:

Half of data lake source setup will be invoiced upon setup initiation, the other half upon completion.

Managed Data Services (MDS) will initially be pro-rated and invoiced according to the start date. Subsequent MDS invoices will be sent at the beginning of each month.

Addendum C: Renewals and Cancellation

Renewals:

This contract will automatically renew on a month-to-month basis unless either party provides written notice of the intent to cancel.

Upon renewal, the terms of this contract, including pricing and service levels, may be subject to review and adjustment. Pricing adjustments may be made in response to factors such as changes in market conditions, inflation, or enhancements to the service.

Once under a month-to-month agreement, Blue Margin reserves the right to adjust the pricing with thirty (30) days written notice to the client.

Cancellation:

Upon entering month-to-month agreements, the Client may cancel MDS by providing a written notice of cancellation to Blue Margin.

Termination of this contract, both in full or a partial cancellation of one or more lines of service, requires 30 days' written notice. For example, if you want February to be your final month on a service(s), we'd need notice by the last business day of January.

We do not prorate invoices or provide work for a partial month after the initial month.

Notices of cancellation should be emailed directly to the client's assigned Client Success Manager at the designated Blue Margin email address provided at the start of services.

Fort Collins-Loveland Water District

To: FCLWD Board
From: Eric Dowdy, Chris Pletcher
Date: 12/10/2024
Re: Additional Stratus Server for SCADA

As our distribution system continues to grow, our SCADA requirements continue to expand as well in order to scale with these needs. Our current Stratus server is maxed out on RAM capacity and processor performance; we need an additional server to address our increased current and future needs. The existing Stratus server (FtServer 2900) has about 5 years of life remaining. While we could put all the functions on the new server, the plan is to put primary functions on the new server but use the existing server to share some of the load. In leapfrog fashion, we will then plan on replacing the existing server in about 5 years.

Some of the immediate needs include needing to configure additional Virtual Machines (VMs) to run cyber security software, having more room to rebuild some of the VMs, room to build copies of current environments for testing updates and increased capacity and performance to run additional SCADA software moving forward, including a larger Historian database and increased use of operational predictive maintenance tools.

We evaluated 3 Stratus server options (attached), so that we are consistent with the existing level and type of hardware we currently have. Which is a high availability, fault tolerant virtual machine server housed on-premise. Based on load calculations, and using a planning horizon of 10 years, the team selected the Stratus ZtC Endurance 5100 server. This is in their latest generation of fault tolerant servers using the newest technology and processors. This server allows the District to simultaneously address the immediate need for increased capacity/performance and have the headroom to flex with increased needs for the future.

Budget Line Item:	8540
Annual Budget (2024)	\$12,078,000
Actual through 12/1/2024:	1,700,000
Requested Amount:	\$102,000

OT SCADA - Existing VM on current Stratus Server					
PC Name	Windows OS	Memory	vCPU	HDD	Expected system life/Notes
FCLWD-SCADA-AD01	Server 2019	12GB	4	150GB	This server has been having failures and must be rebuilt. The OS is also 2019 and needs to be updated to Server 2022
FCLWD-SCADA-A	Server 2022	24GB	4	80GB	This server is the Primary SCADA node and should be on a separate server than the Backup SCADA node for maximum business continuity.
FCLWD-SCADA-B	Server 2022	12GB	4	120GB	This server is the Backup SCADA node and should be on a separate server than the Primary SCADA node for maximum business continuity.
FCLWD-HISTORIAN	Server 2016	12GB	4	300GB	This is a critical server for saving Historical data. This server is running on a very old OS and needs to be updated to Server 2022 and the latest version of GE Historian. This system often hits 60-80% of CPU
FCLWD-RDS-A	Server 2022	16GB	4	90GB	This system is a newer build. There is no backup RDS server, so if this server goes down, clients must use another method for viewing the SCADA. A plan for a quick VM restore should be put in place. Or backup Cold VM on a separate host.
FCLWD-SCADA-AD2	Server 2022	8GB	2	90GB	This is the backup Active Directory Server. This server should be hosted on a separate physical server in order to maximize business continuity
FCLWD-SCADA	Server 2016	16GB	4	250GB	This is the original SCADA VM and the Win911 server. The Win911 server will need to be moved to a new host server. The OS is very old and insecure. This server will be decommissioned once all PLCs have been converted.
ftSysMgmt-46333	CentOS 7	2GB	1	20GB	This is the Stratus Maintenance VM. This requires very little throughput. It must be hosted on the Stratus server that it manages.
TOTAL vCPUs used			27		

Summary of Comparisons

The current Host Stratus server which is an ftServer 2900 currently has a maximum of 20 usable Logical processors on a single 2.2 Ghz Xeon Silver 4114 processor. The processor is currently over provisioned in order to get 27 processors assigned to the VMs. This is not optimal for any server. Also, this current processor is locked at 2.2 Ghz. Most new OS's and applications require a higher GHz for optimal performance. The Stratus 5100 processor has the ability to use the turbo speed of the processor up to 3.9 Ghz. This is a great system improvement for the Primary system, using the old stratus server as the backup server. The ztc5100 has Dual processors with 24 useable CPU's per processor, given the system 48 vCPU capability. The ztc3100 has a single processor and supports 24 useable vCPUs. As the District moves forward with VMs for Cyber security, analysis, redundancy, etc. more vCPU capability is important for growth. Using the current Stratus ftServer2900 to host some of the VMs that require less processing power. The ztc3100 has a maximum memory of 256GB of RAM and the ztc5100 has a maximum memory of 512GB RAM.

Stratus[®] ztC Endurance[™]

Evolutionary predictive
fault tolerant computing
delivering protected,
serviceable performance
for next generation,
sustainable operations.

The Stratus ztC Endurance platform enables organizations to run critical applications without downtime or data loss, in edge or data center environments, using intelligent, predictive fault tolerance based on Stratus' proven redundant hardware architecture, hardened drivers, and Stratus Automated Uptime Layer with Smart Exchange[™].

Across industries, organizations rely on the continuous availability of mission-critical applications to successfully meet the demand of "always on" operations. For these essential processes and operations, any unplanned downtime can significantly impact productivity, revenue, reputation, and safety. For these operations, failure recovery is not good enough. Organizations running vital applications require continuous availability of data and applications and the modern infrastructure to enable failure prevention.

Both OT and IT teams face the challenge of delivering this reliability in both centralized and distributed locations across their operations. They also may lack on-site technical staff needed to maintain complex inf

Platforms running critical applications must be easy to deploy, easy to manage, and easy to service—and not just in data centers, but at the edge of corporate networks.

Stratus ztC Endurance provides continuous availability and ensures data integrity for mission-critical applications running at the edge, operations center, and data center. Delivering seven nines (99.99999%) uptime, its Automated Uptime Layer with Smart Exchange provides continual proactive health monitoring and automatically takes action to maintain system availability and protect against data loss when needed. Coupled with the platform’s modular design of hot-swappable customer replacement units (CRUs), ztC Endurance makes it easy for OT and IT teams to manage and support. ztC Endurance delivers the processing power and performance to host dozens of software applications as virtual machines (VMs), dramatically reducing the number of PCs or servers required for OT and IT teams to manage and maintain.

Key Benefits

- **Seven nines availability for critical applications:** Built-in computing fault tolerance delivers 99.99999% availability to run critical applications.
- **No loss of data:** Redundant computing architecture combined with intelligent automated management prevents in-flight data loss and ensures data integrity.
- **“Zero touch” management and support:** Modular design plus pro-active remote health monitoring and self-healing simplifies system management and serviceability for both IT and OT teams.
- **Rapid modernization and workload consolidation:** Modernize infrastructure and streamline operations by leveraging virtualization to consolidate multiple software workloads onto a single platform.
- **Multi-layered security:** Supports multi-layered defense-in-depth approaches, with focus on both process and product security guidelines to ensure maximum protection.
- **Lower TCO:** Reduce IT footprint and purchase fewer software licenses on a highly reliable platform with an expected 7-10 year lifespan, twice that of traditional servers.

Stratus ztC Endurance features

Using Stratus ztC Endurance, organizations can rapidly modernize IT infrastructure to maximize reliability, simplify manageability, and increase efficiency with minimal risk. Several key features help make ztC Endurance easy to deploy, easy to manage, and easy to service—at the enterprise data center, operations center, or edge location:

English

Intelligent, predictive fault tolerance

Stratus ztC Endurance delivers built-in fault tolerance that is transparent to applications without any scripting or modification. Stratus' Automated Uptime Layer with Smart Exchange™ (AUL – Smart Exchange) software automatically manages system resources to ensure continuous availability while providing a single system image to operating systems, applications, and users. AUL – Smart Exchange monitors nearly 500 alarm points to predict and avoid a potential failure before it occurs, taking action before operations are impacted.

Proactive health monitoring

Stratus ztC Endurance delivers automated self-monitoring, alerting, self-diagnosing, and remediation capabilities. Using the Stratus ActiveService™ Network (ASN) or an organization's existing monitoring methods, Stratus, partners and/or customers can receive platform health information and alerts. In most cases, the AUL – Smart Exchange identifies and resolves potential issues before they occur while keeping the appropriate teams informed at all times.

Industry standard components

Stratus ztC Endurance is engineered with the highest quality industry-standard components – Intel chipsets, RDIMMs, I/O cards, network cards, and NVMe drives. The platforms run standard shrink-wrapped operating systems and hypervisors, support industry-standard application programming interfaces (APIs), and cybersecurity software for ease of management, open interoperability, remote management, and security. Stratus builds on this design with its hardened drivers and built-in fault tolerance.

Workload consolidation

Stratus ztC Endurance offers the flexibility to run critical applications on bare metal – with the choice of industry-standard operating systems from Microsoft or RedHat – or to consolidate workloads with the hypervisor of your choice – whether VMware vSphere or Microsoft Windows Server with Hyper-V. With built-in virtualization, teams can easily consolidate multiple servers and devices onto a single, fault tolerant platform, allowing them to run more applications, improve performance, reduce total IT footprint and costs while ensuring application availability and uptime.

Manageable and serviceable by OT and IT

Status ztC Endurance simplifies manageability with remote monitoring capabilities and management APIs interoperable with standard systems. ztC Endurance is also easily serviceable without specialized IT skills or tools. The platform features four pairs of hot swappable customer replaceable unit (CRU) modules. When a CRU module is replaced, the system automatically returns the module to operation, making ztC Endurance ideal for environments with limited IT resources.

Modular design with redundant CRU modules

Each ztC Endurance platform has four pairs of identical customer replaceable unit modules (CRU modules)—two compute modules, two storage modules, two I/O modules, and two power supply modules. Together with the AUL – Smart Exchange, the redundant pairs of CRU modules act as a single system maintaining 99.99999% availability.

Connectivity to critical infrastructure

Stratus ztC Endurance provides the highest levels of computing reliability, enabling acquisition of critical data and connection to enterprise systems whether in the data center or at the edge. The platform ensures secure and fast access to crucial data in your Storage Area Network (SAN) with reliable File System and Network connectivity. ztC

Endurance enables single pane of glass visibility of your industrial automation infrastructure with OPC-UA Server, integrating standards-based interoperability and security for connectivity with digitized sensors, industrial equipment, and industrial software applications.

Stratus ztC Endurance models

Stratus ztC Endurance platforms are easy to deploy, easy to manage, and easy to service. We offer three different ztC Endurance models to meet the workload, environment, and budget of today's application dependent enterprises and edge locations.

Stratus ztC Endurance 3100

Affordable performance for stable, fixed standalone applications in remote offices, branch offices, or shop floor locations

Stratus ztC Endurance 5100

Versatility and flexibility for rapidly growing or evolving applications in regional offices, remote plants, or regional data centers

Stratus ztC Endurance 7100

High performance for high volume data- or transaction-intensive applications in large remote plants or corporate data centers

Fort Collins-Loveland Water District

To: FCLWD Board of Directors
From: Linsey R. Chalfant, PE – Civil Engineer III
Date: 12/10/2024
Re: Western Backbone Transmission Project-Phase III-Allocation Request #01-Early Material Procurement

Western Backbone is a 42” multi-phase transmission project extending 4 miles in western Fort Collins from Overland Pump Station to the Taft Pump Station. This project will replace an intersection bottleneck in the system at West Prospect and South Overland Trail and undersized transmission mains along the western edge of our service area, increasing hydraulic capacity and improving overall system performance. The completion of this project is critical to continue to deliver reliable and affordable water to our customers. By installing larger capacity transmission mains, the District can optimize delivery of its Soldier Canyon Filter Plant source water over the use of City of Fort Collins interconnects during peak water use periods.

- Phase 1 and 2 of the Western Backbone Project (shown in red below) were constructed in 2023 and 2024 respectively.
- Phase 3 (shown in yellow below) is anticipated to go to construction in February of 2025 and will connect the segments that were installed in 2024. Future phases of the alignment are shown in blue.

Fort Collins-Loveland Water District

With construction projected to go to construction in February of 2025, Connell Resources has indicated that large 42” pipe, valves, blowoffs, and fittings have long lead times for delivery. In an effort to meet this project deadline, the team is requesting an allocation for early material procurement to initiate a Task Order with Connell Resources to procure these materials. A construction task order is projected to come to the board for any remaining materials, activities, labor, and equipment in January.

Additionally, an allowance item is included in the allocation for miscellaneous expenses that may arise as we approach construction including City of Fort Collins street cut impact fees, sewer service locating, utility relocations, permit fees, etc.

The table below shows an estimated breakdown of the allocation request.

Allocations			
Project	Western Backbone Transmission-PH3		
Project Number	PROJ-0026.03		
Estimated Timeline	6 months		
Allocation #	1		
Allocation Approval Date:	24.12.10		
Allocation Approval Amount:	\$	3,776,000.00	
Item/Contingency/Risk	Allocation Amount	Entity	Comment
Material Procurement	\$ 3,396,000.00	Connell	
Misc. Allowance	\$ 200,000.00	District	street cut fees, sewer locating, utility relocations, permit fees, etc.
Contingency	\$ 180,000.00		10%
Allocation Request	\$	3,776,000.00	

Recommendation:

Engineering recommends Board approval to allocate \$3,776,000 for Phase 3 of the Western Backbone Project.

Budget Line Item (2025):	9140 Distribution (Non-Operating)
Annual Budget (2025):	\$32,979,000
Actual on 12/1/2024:	\$0
Requested Amount:	\$3,776,000

Fort Collins-Loveland Water District Special Board Meeting Minutes
Thursday, January 2, 2025 12:30 PM
5150 Snead Drive, Fort Collins, CO

1. (12:30) Roll Call

*Directors
Present:*

*James Borland, Chairman
William Dieterich, Vice-Chairman,
Peter O'Neill, Treasurer ,
Stephen Smith, Director,
Denis Symes, Director*

Others Present:

*Chris Pletcher - General Manager /
Secretary,
Liza Hayden - Special Projects Manager,
Amanda Proctor - Finance Director,
Jessica Decker - Human Resources
Manager ,
Sandra Bratlie - District Engineer ,
Allison Ulmer - Collins, Cole, Winn, &
Ulmer, PLLC,
Alison Gorsevski - Lyons Gaddis,
Adam Jokerst - WestWater,
Carl Brouwer - Northern Water,
Lisa Thompson - Northern Water*

2. Consideration of Agenda

No change

3. Administrative Updates

- 3.1 Election Update: Board Candidate Nomination Process
- 3.2 Board Direction on Priorities for the General Manager for 2025

4. Discussion

- 4.1 Water Resource Topics
- 4.2 Financial Forecasts
- 4.3 Economic Indicators

5. Executive Session

- 5.1 **The Board of Directors may enter into an executive session pursuant to Section 24-6-402(4)(b), C.R.S. for the purpose of a conference with the District’s legal counsel regarding specific legal questions pertaining to the status of the Northern Integrated Supply Project (NISP) (ACTION NEEDED):**

Recommended Motion: Move that the Board of Directors enter into an executive session pursuant to Section 24-6-402(4)(b), C.R.S. for the purpose of a conference with the District’s legal counsel regarding specific legal questions pertaining to the status of the Northern Integrated Supply Project (NISP).

Moved by: Denis Symes

Seconded by: William Dieterich

Carried 5-0

Metered revenue includes billings to customers and is the primary source of operating revenue. Customers are billed for the prior month's consumption. The fluxuation year over year is the result of weather variations, increase in number of customers served and rate increases.

The historic average is the average of the last three years' actual revenue.

Re: District Auditor

Per State Statute, the District must have an annual audit performed by and independent auditor annually.

For the past three years (2023, 2022, 2021) the District has engaged with Baker Tilly to perform the required audit and issue audited financial statements.

Baker Tilly has been a great partner in meeting not only the state required deadline for audit filing, but also deadlines that staff have requested. The staff assigned to the District audit have also been consistent which aids with the working relationship and ensures a great audit experience and product.

The engagement letter provided by the auditor to the District is for the 2024, 2025 and 2026 audits. This does not encumber funds for future years; rather it solidifies Baker Tilly's commitment to the District for these periods.

Staff request is to approve the audit engagement letter and have the General Manager sign said agreement.

Re: Engineering truck purchase and trade in

The District's goal is to replace fleet vehicles when they exceed both 10 years of age and 100,000 miles. The District also analyzes repair and maintenance costs to determine if a vehicle should be traded in early.

Currently there is one truck that the has had a high amount of repairs and is showing signs of a much larger repair. We would like to trade in this truck for a similar truck (4x4 super crew cab short box). This truck would be assigned to Engineering.

I am requesting authorization to complete this purchase, associated truck fit ups and any trade ins.

Re: 2025 GrayMatter Scada Maintenance Proposal

For the past 2 years FCLWD’s SCADA/OT partner, GrayMatter, has provided SCADA maintenance services for FCLWD. This is in lieu of having a full time I&C in-house technician. We are ready to renew their 2025 maintenance agreement. This agreement provides the needed ongoing SCADA maintenance and support of the SCADA system and software. Activities covered under this agreement include updating SCADA software, server software, VMWare, radio and cell modem telemetry, PLC programming and maintenance, Win-911 software, maintenance and adjustment of SCADA metrics and control logic as needed.

Already accounted for in the 2025 budget, the proposal, which is flat to last year’s agreement, is for \$105,000. This includes 480 service maintenance hours for 2025, or roughly 40 hours per month.

2025 Budget request: \$105,000.

Re: Remote Sites Remaining 2024 budget rolled into 2025 budget

FCLWD's OT partner, GrayMatter, has made great progress toward upgrading the remote sites and the SCADA system, in 2024. The old MOSCAD PLCs exposed the District to a high risk for failure and no way to keep them updated. The team has 3 remote sites left to upgrade: Overland Pump Station, Foothills Tanks, Soldier Canyon Water Treatment Plant (the FCLWD Telemetry PLC here sends data to their SCWTP SCADA system to provides predictive indicators on treatment capacity that is needed). We anticipate these final 3 sites being completed in Q1 of 2025.

Currently, there is \$109,000 of allocation funding left from the 2024 task order to complete this part of the project. The task order expired Dec 31, 2024. We want to roll over this unused portion of the allocation to the 2025 budget, adding it to GL budget noted below, and create a new 2025 task order to finish out this portion of the remote sites upgrade project for the requested amount listed below.

2024 Budget Allocation requested to be rolled over to 2025 budget: \$109,000.

2025 Budget Line Item:	8540
2025 Annual Budget:	\$19,448,000
Actual through 1/07/2025	\$0
Requested Rollover Amount	\$109,000

 Re: Capital Projects 2024 Allocation Rollovers to 2025

A series of allocations and task orders were brought to the Board for approval in 2024 for engineering capital projects. Task orders were initiated under these allocations, however not all the allocation amounts were fully encumbered in a task order. This request would authorize extension of existing task orders through 2025 and remaining available allocation amounts be available in 2025. In some cases, additional task orders may not be needed as the projects are closed out.

Project	2024 Allocation	Task Orders (Encumbered)	Spent to Date	Remaining in Allocation
PROJ-0025: Zone 5 PH 2 & 3	\$ 9,672,000.00	\$ 8,949,586.61	\$ 6,469,057.93	\$ 722,413.39
PROJ-0026: Western Backbone PH 2 & 3	\$ 6,600,000.00	\$ 5,932,444.60	\$ 4,818,578.24	\$ 667,555.40
PROJ-0077: Trilby Tank and Feeder Line	\$ 7,115,356.00	\$ 5,424,841.00	\$ 1,622,106.24	\$ 1,690,515.00
PROJ-0032: Airport Pump Station	\$ 2,285,144.00	\$ 1,872,843.00	\$ 704,570.36	\$ 412,301.00
PROJ-0037: Longview Pump Station	\$ 3,372,500.00	\$ 2,421,094.00	\$ 619,823.96	\$ 951,406.00
PROJ-0048: CLRWTA Transmission	\$ 800,000.00	\$ 721,459.28	\$ 207,432.49	\$ 78,540.72
PROJ-0102: Timnath Conveyance: Buss Grove 24"	\$ 2,200,000.00	\$ 1,679,826.15	\$ 167,926.15	\$ 520,173.85
PROJ-0035: College & Trilby	\$ 1,540,000.00	\$ 136,788.00	\$ 103,720.44	\$ 1,403,212.00
PROJ-0054: Building Remodel	\$ 440,000.00	\$ 80,620.00	\$ 65,699.50	\$ 359,380.00
PROJ-0062: Pierce Farm	\$ 93,000.00	\$ 92,614.00	\$ -	\$ 386.00
PROJ-0027: Airport Transmission	\$ 6,000,000.00	\$ 5,884,695.50	\$ 5,149,770.62	\$ 115,304.50
PROJ-0100-Development Review Contract Services	\$ 60,000.00	\$ 60,000.00	\$ 37,406.50	\$ -

* Spent to Date may not include all 2024 billings due to timing of year end invoicing.

Recommendation:

Engineering recommends Board approval to extend existing task orders through 2025 and remaining available allocation amounts be available in 2025.

 Re: 2025 Slow the Flow Program

Historically, the District has partnered with the City of Fort Collins to provide sprinkler checkups (formally sprinkler audits) to the District’s customers. In 2024 the District switched to contracting with Resource Central to provide sprinkler checkups (Resource Central refers to these as Slow the Flow).

Slow the Flow provides sprinkler audits to residential and non-residential customers. The cost per residential audit is \$155. Non-residential audits are provided on an hourly basis and subsidized through Northern Water.

The recommendation is to offer 150 residential customer sprinkler audits (which matches the District’s historic offering) and to provide a \$5,000 budget for non-residential sprinkler audits (Northern Water will subsidize and increase the total non-residential spend allocation to \$10,000).

The District will engage with WildRock to provide marketing to inform customers.

Some highlights from the 2024 Slow the Flow program:

SLOW THE FLOW

- 39 participating water partners
- 2,893 residential properties
- 48 non-residential properties
- 14,500,000 gallons of water saved*

2024 FORT COLLINS-LOVELAND WD IMPACT

Residential sprinkler evaluations completed	154
Large/non-residential property sprinkler evaluations completed	3
Estimated gallons of water saved annually*	770,000

Staff request is to approve the budget allocation and authorize the General Manager to sign the contract with Resource Central.

Re: Western Backbone Transmission Project-Phase III-Allocation Request #02-Construction

Western Backbone is a 42" multi-phase transmission project extending 4 miles in western Fort Collins from Overland Pump Station to the Taft Pump Station. This project will replace an intersection bottleneck in the system at West Prospect and South Overland Trail and undersized transmission mains along the western edge of our service area, increasing hydraulic capacity and improving overall system performance. The completion of this project is critical to continue to deliver reliable and affordable water to our customers. By installing larger capacity transmission mains, the District can optimize delivery of its Soldier Canyon Filter Plant source water over the use of City of Fort Collins interconnects during peak water use periods.

- Phase 1 and 2 of the Western Backbone Project (shown in red below) were constructed in 2023 and 2024 respectively.
- Phase 3 (shown in yellow below) is anticipated to go to construction in February of 2025 and will connect the segments that were installed in 2024. Future phases of the alignment are shown in blue.

5150 Snead Drive

Fort Collins-Loveland Water District

Western Backbone Phase 3 includes portions of Virginia Dale Drive, Pleasant Valley Road, Wildwood Drive, Cedarwood Drive and Lake Street. Construction is expected to start in late February and last into early October. This allocation request covers the construction phase services for Connell Resources (minus material procurement requested during the December Board meeting), owner carried allowance for potential groundwater remediation, and consultant construction administration and testing services.

The table below shows an estimated breakdown of the allocation request.

Project	Western Backbone Transmission-PH3		
Project Number	PROJ-0026.03		
Estimated Timeline	12 months		
Allocation #	2		
Allocation Approval Date:	25.01.21		
Allocation Approval Amount:	\$	5,208,000.00	

Item/Contingency/Risk	Allocation Amount	Entity	Comment
Construction	\$ 4,400,000.00	Connell	excludes \$3.4M material procurement
Consultant CA Services	\$ 218,000.00	Consultant	Scoped
CTL Testing Services	\$ 40,000.00	Consultant	Scoping in progress
Construction Risk Allowance	\$ 300,000.00	Connell	Owner carried allowance for additional groundwater remediation
Contingency	\$ 250,000.00		5%
Allocation Request	\$ 5,208,000.00		

Recommendation:

We recommend Board approval to allocate \$5,208,000 for Phase 3 of the Western Backbone Project

Budget Line Item (2025):	9140 Distribution (Non-Operating)
Annual Budget (2025):	\$32,979,00
Actual on 1/1/2025:	\$0
Requested Amount:	\$5,208,000

Date: 1/21/2025

Re: Airport Pump Station Rehabilitation and Associated Piping - Allocation Request #01

The District completed a condition assessment, studies on conceptual design and future water demands for the Airport Pump station which has surpassed its design life and is considered to be in poor operational condition. Demands in the Airport Pump Station service territory have also grown beyond the station's capacity and a parallel pump station (County Road 30) was installed in 2005. It was determined by the previous engineering evaluations of the Airport Pump Station / County Road 30 Pump Station service area that the Airport Pump Station and its associated infrastructure should be rehabilitated to aid with the increasing demand and to provide redundancy and operational flexibility.

During the preliminary design phase several options for the rehabilitation of the Airport Pump Station were evaluated. Based on this evaluation it was determined that a new pump station in the same location was the District's best option. A new pump station will provide reliable water service and operational flexibility to the east side of the District's system for decades to come. Throughout the distribution system the District currently has both pump station vaults and above ground pump stations. Operations prefer the access and convenience of the above grade pump stations. Therefore, the new Airport pump station will be above grade and contained within a building.

HDR and Hensel Phelps were selected to design and construct the Airport Pump Station project. The Airport Pump station team has completed the design of the new pump station. Engineering staff would like to request funds to be appropriated and approval to award the construction contract for the replacement of the Airport Pump station. This allocation excludes early procurement items previously approved at the June 18th, 2024, Board Meeting. An ICE has been completed for the project and costs were reconciled to within 1%.

This allocation request will allow staff to execute Task Order(s) to move forward with construction of both the station and the completion of the new suction line for this facility. There are pending decision items that will affect the trajectory of the project such as start of construction, ditch crossing agreements, and temporary lease agreements. This allocation will allow the team to make quick decisions and execute task orders in a timely manner to keep the project moving. Task Orders will only be executed if warranted and with a defined scope, fee, and a not to exceed cost. The team will also seek board approval for any costs exceeding this allocation request.

Fort Collins-Loveland Water District

The table below shows an estimated breakdown of the allocation request.

Allocations				
Project	Airport Pump Station Replacement			
Project Number	PROJ-0032.03			
Estimated Timeline	12 months			
Allocation #	1			
Allocation Approval Date:	1/21/2025			
Allocation Approval Amount:	\$ 5,861,000.00			
Item/Contingency/Risk	Allocation Amount	Entity	Comment	
HDR Design Services	\$ 200,000.00	HDR Inc.	Scope/Fee in progress	
Pump Station Construction	\$ 4,700,000.00	Hensel Phelps		
Suction Line Connection	\$ 850,000.00	Connell Resources		
Incidentals	\$ 111,000.00			
Allocation Request	\$ 5,861,000.00			

Recommendation:

We recommend Board approval to allocate \$5,861,000 for Airport Pump station Replacement.

Budget Line Item: 8540 Distribution System (Operating)
 Annual Budget: \$19,488,000
 Actual on 01/01/2025: \$0
 Requested Amount: \$5,861,000

Re: FCLWD 2024 Residential Population Model Update

2024 Estimated Residential Population

Fort Collins-Loveland Water District

Completed January 2025 with Tap sale data current as of December 31, 2024.

Summary:

The estimated residential population served by the District at the end of 2024 is 66,813. For comparison, the estimated population served in July 2023 was 65,537. Both estimates exclude Windsor and Spring Canyon wholesale residents.

Methodology:

The District has 20,494 tap accounts as of December 31, 2024. Of these accounts, 19,407 are Residential taps including Single Family (18,117), Single Family Conservation (563) and Multi-family (727). Population for Multi-family accounts are determined by using the Dwelling Unit (DU) value from our BillMaster Database and multiplying the Population Per Household (PPH)¹.

The remaining accounts are assigned a DU and population of 0. They include Commercial (759), Irrigation (313), Standby (10), Non-Residential (4), or Other (1).

Jurisdiction	Population Per Household (PPH)
Fort Collins	2.73
Larimer County	2.53
Loveland	2.65

Re: FCLWD Levels of Service Introduction and Overview

There are five core components of asset management and ultimately an efficient management and operation of a water utility. Those are asset inventory, level of service, criticality, life cycle costing, and long-term funding (Figure 1).¹ Levels of Service (LoS) framework and goals ensures that the services provided meet the expectations of customers and stakeholders while aligning with regulatory requirements, organizational goals and operational capabilities.

Figure 1. Five core components of asset management.

This approach helps clarify and define what customers can expect from a water utility. When customers understand what an organization is providing for them in terms of service and they are given a say in what the utility may provide in the future, they are more willing to pay. Customers need to understand that service is related to cost and typically the higher the level of service desired, the higher the costs

¹ Southwest Environmental Finance Center: <https://swefcamswitchboard.unm.edu/am/the-five-core-components-of-asset-management/>

Fort Collins-Loveland Water District

associated with producing that level of service. Determining what the customer wants and is willing to pay for, drives the decision making for the utility.

AWWA defines Levels of Service as a statement of outputs, goals, or objectives (LoS goals) that water utilities or their activities intend to deliver to customers and stakeholders. Approaching this as a framework, LoS goals should be developed, documented and measured. LoS goals should be simple and relevant to an organizations mission and written as SMART goals - Specific, Measurable, Attainable, Realistic, and Time Bound (when appropriate). The associated performance measures (PM) and key performance indicators (KPI) can be either direct or indirect measures of success.

The development of effective LoS goals are driven by three inputs: Stakeholder Expectations, Organizational Goals, Technical Capabilities. The drivers can be characterized as both internal and external facing or a combination of both. Stakeholder and organizational LoS are usually tied to how customers receive service and are characterized as external LoS. Technical LoS are typically tied to asset performance, which is characterized as an internal LoS.

The development of LoS Goals, KPI's and PM's are not immediate and should be done over time with input from all drivers. *Establishing Levels of Service as the Foundation of Utility Asset Management*, Journal AWWA (May 2023) presents the general progression of as shown in Figure 2.

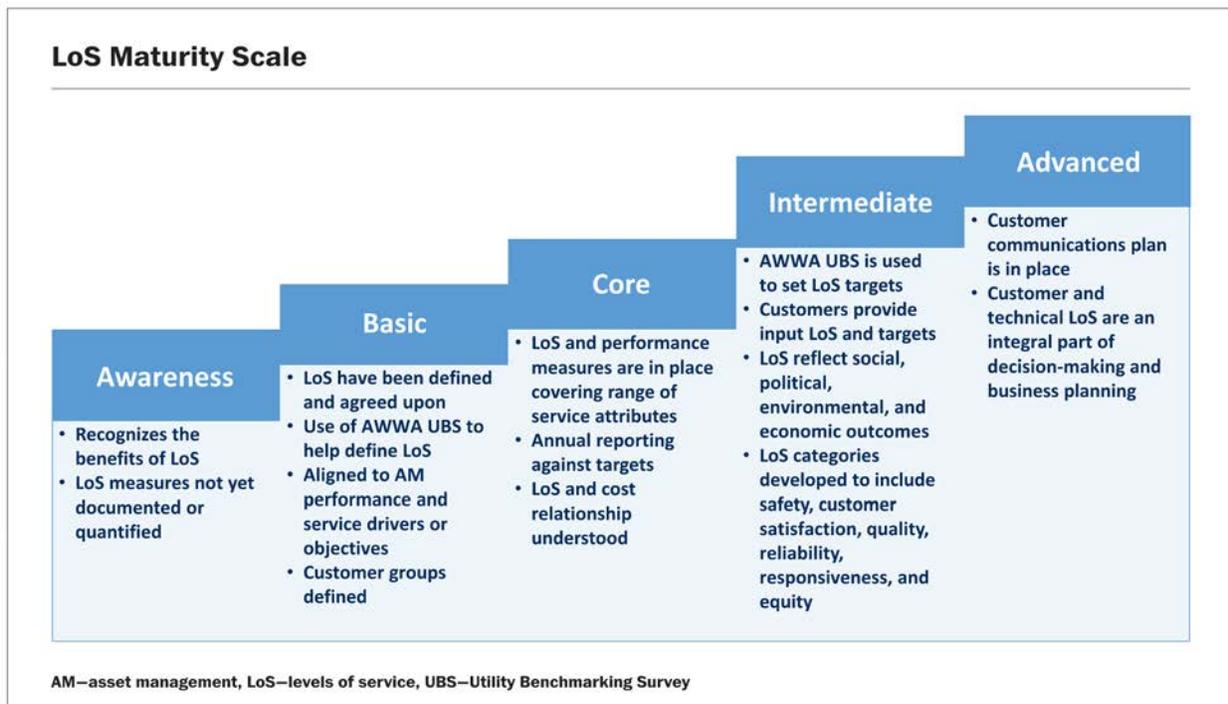

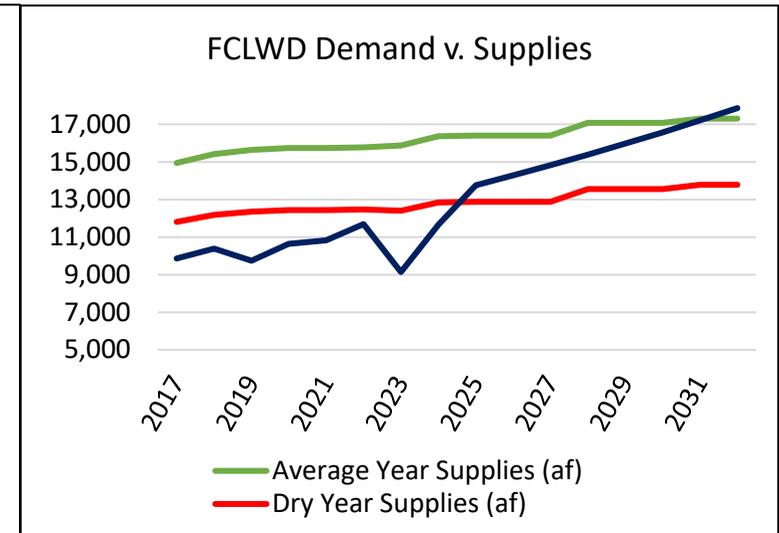

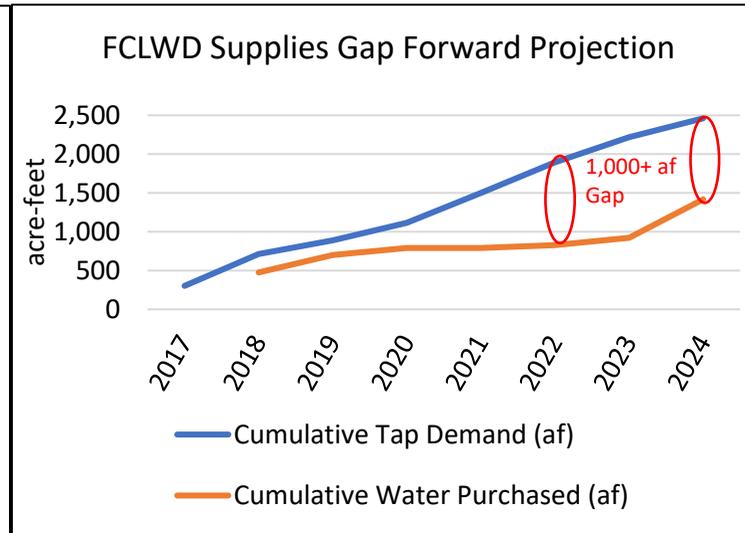

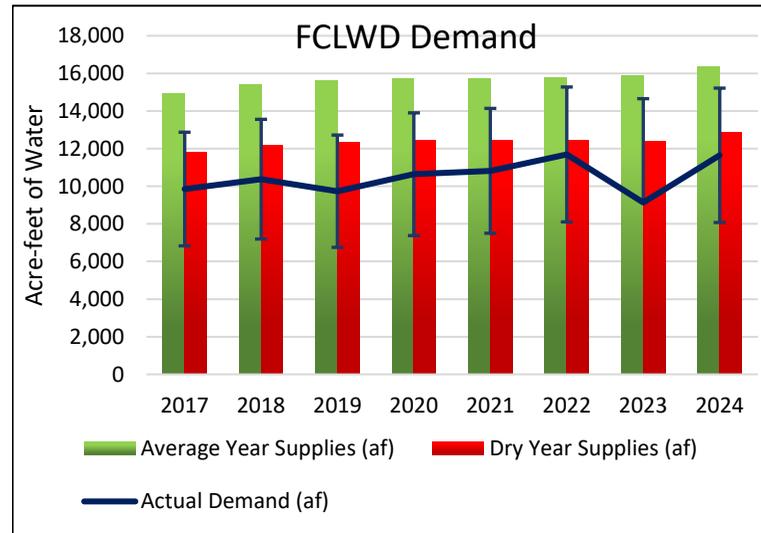

Figure 2. LoS Maturity Scale

The Levels of Service concept is integral to the effective management of water utilities. By setting clear standards and aligning asset management activities with these standards, the utility can ensure the delivery of high-quality services to its customers.

FCLWD - Closing the Gap Change in Demand vs. Water Supply

Supply	2017	2018	2019	2020	2021	2022	2023	2024
Average Year Supplies (af)	14,941.4	15,417.2	15,640.5	15,732.9	15,732.9	15,770.7	15,865.0	16,358.5

Proposal

To: Chris Pletcher, General Manager, Fort Collins-Loveland Water District
From: WestWater Research
Date: January 16, 2025
Re: Proposal for 2025 Water Resources Support

Background and Purpose

The Fort Collins-Loveland Water District (“District”) provides treated water service to south Fort Collins, Timnath, and areas north of the City of Loveland. The District is growing, and it expects to need approximately 10,000 acre-feet (“AF”) of new water supplies in the future. Historically, the District has relied on Colorado-Big Thompson (“CBT”) water to provide a majority of its source water; currently, over 90% of the District’s water comes from CBT. The District is limited in its ability to acquire new CBT due to rules of the Northern Colorado Water Conservancy District (“Northern”). Therefore, the District is looking to diversify its water supply. A large portion of future water need is anticipated to be filled by the Northern Integrated Supply Project (“NISP”). Additional sources of acquisition may include Poudre River water rights and non-tributary groundwater sources in northern Weld County. The District is pursuing sources that can be treated at a new regional water treatment plant proposed near Cobb Lake – the Cobb Lake Regional Water Treatment Facility (“CLRWTF”).

WestWater Research, LLC (“WestWater”) is providing this proposal to assist the District in water resource planning for the CLRWTF, operational planning for integrating groundwater into the District’s water resource portfolio, and other on-call water resource consulting.

Scope of Services

Task 1: CLRWTF Water Resources Planning

WestWater will prepare a water resource plan specific to the CLRWTF. The District has numerous water supply and water infrastructure plans related to the Soldier Canyon Filter Plant (“SCFP”) and the greater District water system. However, District staff have indicated a need for water resources and operations plans specific to future use of the CLRWTF.

The CLRWTF Plan will begin with an assessment of water demand on the CLRWTF and of the District’s existing sources of supply that can be delivered to and treated at the CLRWTF, SCFP, and both. The assessment will include a calculation of volume, timing, and reliability for each source, as well as identification of any required 3rd party approvals to use the supply (e.g., ditch company carriage agreements, Water Court approval, Northern Water approval, etc.). Supply availability will be matched to the planned seasonal operation of the CLRWTF to determine monthly yield. Transmission and carriage losses will be incorporated to compare the yield of each source of supply at the SCFP and CLRWTF. For this task, WestWater will work closely with SCFP Water Resources staff and assumes the District will provide existing system operations models, which will be modified to simulate specific operations of the CLRWTF.

WestWater will then consider future sources of supply that can be treated at the CLRWTF, such as Poudre Basin agricultural water rights, NISP, and non-tributary groundwater. Yields of such sources will be integrated into the water resource modeling from above, and costs and risks developed. Annual expenses for such sources will be developed and added to the cost of treatment at CLRWTF and the SCFP. The simulation of non-tributary groundwater will be conducted in concert with Task 3 below.

Using the data from above, WestWater will develop an Excel-based decision support tool to rank sources and compare such parameters as operational costs, yields, losses, and decree limits across sources treatable at the CLRWTF and SCFP. WestWater will consult with District staff to generate an implementation plan for the integration of the CLRWTF into the District's existing water system.

Task 2: Groundwater Operations Planning

WestWater will evaluate integration of non-tributary groundwater into the District supply portfolio. WestWater will construct an operational cost model to assess the cost implications of groundwater use relative to existing sources of supply. Additional considerations will include:

- Sources of supply for aquifer storage and recovery ("ASR"), including federal and state recharge regulations and decree limitations
- Opportunities for recharge and/or reuse of effluent generated from first use of non-tributary groundwater
- Timing and priority of use of groundwater relative to other source water supplies
- Trade and exchange opportunities of groundwater or reusable effluent with other CLRWTF entities or other partners

The groundwater operations planning will be integrated into the CLRWTF Plan from Task 1 above.

Task 3: On-Call Water Resources Technical Support

WestWater will provide on-call technical services related to water supply planning and development. As directed, WestWater will provide economic and engineering technical support for the District's water resources operations, water rights negotiations, water rate and fee setting, water acquisition diligence, regional partnering, and other tasks yet to be defined. This scope does not include originating or negotiating acquisitions for the District, diligencing the VITA H2O groundwater project, or providing the District expert support in water court applications or oppositions.

Deliverables

A standalone technical report will be developed for each of Tasks 1, 2, and 3. In addition, the decision tool and any operational models from Task 3 will be provided to the District. WestWater will provide draft reports for District review and will address any revisions within two weeks following receipt of District comments.

Timeline

Services this proposal will proceed throughout 2025. WestWater anticipates commencing Tasks 2 in February 2025 and will complete its evaluation in 8 to 12 weeks. Task 1 will commence at the direction of the District, anticipated in Q2 2025.

Project Budget

The tasks in this scope of work will be billed on a time and material basis. The anticipated budget for identified tasks is \$61,500 and is detailed in the table below. Task 3 will be billed on an as-needed, as directed basis, up

to a proposed budget of \$20,000. This budget was estimated using WestWater’ standard 2024 hourly billing rates, attached to this proposal.

Task	Budget
Task 1: CLRWTF Water Resources Plan	\$31,700
Task 2: Groundwater Operations Planning	\$29,800
Total	\$61,500
Task 3: On-Call Water Resources Technical Support*	\$20,000
Total, with On-Call	\$81,500

*Billed on an as-needed, as directed basis

Appendix A: Rates and Expenses

2024 Professional Rates & Services

Personnel	Hourly Rate
Chief Executive Officer	\$600
Regional Directors, Principals, Chief Operating Officer	\$350 - \$475
Senior Associates	\$225 - \$325
Associates & Subject Area Directors	\$175 - \$250
Analysts, GIS Analysts, & Data Management	\$125 - \$175
Administrative and Support Staff	\$120
<i>Expert witness rates are billed at \$500 per hour for deposition and trial days with a minimum of 8 hours per day billing.</i>	
<i>Rates increase 5-10% annually, effective on the first day of each calendar year.</i>	

2024 Project Related Expenses

Expense	Description
Airfare	Actual expense based on an economy class ticket for the most direct route and economical carrier based on availability with five (5) day minimum advance purchase.
Hotels	Actual rates based on the standard single room.
Rental Car	Actual rates based on a standard, midsize car.
Mileage	Sixty-seven cents (\$0.67) per mile.
Data	Actual cost plus a 15% administrative fee.
Reproduction	Actual costs.
Other Expenses	Other standard and customary expenses such as business-related phone calls, postage and delivery charges, or incidentals will be fully reimbursed at cost.
Subcontractor Fee	Administrative management fee of 15% on subcontractor work managed by WestWater.

FORT COLLINS-LOVELAND WATER DISTRICT

 Re: Capital Project Update – Trilby Tank Feeder Line

PROJECT MANAGER: Carlos Medina, P.E.

More project information at:
<https://fclwd.com/water/construction-projects/>

The 30” waterline installation for Trilby Tank Feeder Line is progressing as planned.

MILESTONES ACHIEVED

- Installation of 227 LF of 42” steel casing under the future Larimer County Transfer Station access roads
- Installation of approximately 400 feet of 30” waterline
- Mobilization of bore crew
- Connection to the exiting 4 MG water tank 24” feeder line

UPCOMING MILESTONES

- Mid/Late January: Auger bore under Taft Hill Road
- February: Open cut installation of 30” waterline in easement parallel to Trilby Road
- Late Feb/Early March: Tie into the existing 36” waterline on the east side of Taft Hill Road.

PROJECT HURDLES

- Waterline tie-in to the existing 36” and 24” waterlines
- Coordination with project stakeholders
- Cold weather construction

OUTREACH ACTIVITIES

- Door hangers prior to start of construction to all adjacent properties
- Personal coordination with the County Landfill, Behavioral Health, and City of Fort Collins Natural Areas
- Maintain project webpage on District site

Left: Backfill of 30” waterline in cold weather

Center: Installation of steel casing for future Transfer Station access roads

Right: Existing 24” 90 degree bend and tie in location for the 30” feeder pipe line to the existing 4 MG Tank
